

How can 16 pennies build new roads and get traffic moving?

www.johnschroder.com

For every gallon of gas we pump in St. Tammany and Tangipahoa Parishes, the State of Louisiana receives 20 cents. That amounts to over \$50 million per year! Right now, only four pennies of the 20 are dedicated to long-term road building. **With this kind of money, why can't the politicians in state government do something about our roads and traffic?**

Because they are NOT watching the pennies!

- ✓ **Re-route all 16 cents of the undedicated gas tax** from the General Fund to road building and ongoing maintenance.
- ✓ **Prioritize road building projects** on a population basis to help growing areas like the Northshore immediately.
- ✓ **Explore more public-private partnerships in road building** (like toll projects) to cut costs, maximize our tax dollars and expedite projects.
- ✓ **Fight for more Northshore road projects** to be included in the TIMED Program – our state's long-term road building plan.
- ✓ **Think and act proactively to expand roads now** – like widening the I-12 corridor to six lanes – before costs become too high.

JOHN SCHRODER BECAME A SUCCESSFUL SMALL BUSINESSMAN BY WATCHING THE PENNIES. HE HAS A PLAN TO PUT OUR GAS TAX TO WORK – SO WE CAN GET TO WORK FASTER, ON SAFER ROADS AND BRIDGES.

The Conservative Choice to Fix Our Roads and to Get Traffic Moving!
